UNMATCHED **STRENGTH**. OPTIMAL **BALANCE**. EXPLOSIVE **POWER**.

CORE TECHNOLOGIES

- Axenic Technology is a patented process by which we combine a compression molded shaft into a true one-piece stick.
- The seamless construction puts the player's hands in direct contact with the puck, producing unmatched feel.

- SmartPly is a process by which fiber angles, and the order of those angles, are optimized in up to 25 layers of unidirectional carbon fiber in a single shaft.
- SmartPly creates the perfect marriage between weight, balance, and industry-leading impact strength.

- SmartFlex is a design process by which a stick's stiffness profile is optimized for all shot types. The result is a more powerful shot from any shooting position.
- Shaft becomes progressively stiffer towards the blade.

/ LIGHTER WEIGHT

/ IMPROVED DURABILITY

/ INCREASED RESPONSIVENESS

- The improved BRT+ technology extends the braided rib structure into the heel, improving durability while reducing wall thickness and producing a lighter, more responsive blade.

20%

Greater shaft impact strength
over its predecessor!

| JR | 335g | 50 | 54" | TC2.5, TC4, MC | |

THE POWER SHOOTER'S STICK

BRT+ BLADE TECHNOLOGY

Engineered For Strength.

BRT+ blade technology produces a lighter, more durable blade allowing us to distribute weight into the shaft for extreme impact strength and overall durability of the stick.

ONE-PIECE AXENIC CONSTRUCTION

Optimized For Balance.

Industry-leading one-piece Axenic construction allows for optimized distribution of weight throughout the stick for unmatched balance.

SMARTFLEX DESIGN

Designed For Power.

With a flex point just below the bottom hand, our SPB sticks are optimized for ease in energy loading, to produce explosive power from any shooting position.

| SR | 6" |
| JR | 6" |

A SERIES

A SERIES

OPTIMIZED **BALANCE**. SUPERIOR **DURABILITY**. MAXIMUM **STRENGTH**.

GOALIE STICK TECHNOLOGIES

Playmaking ability of a foam core stick, and the durability benefits of a carbon fiber design.

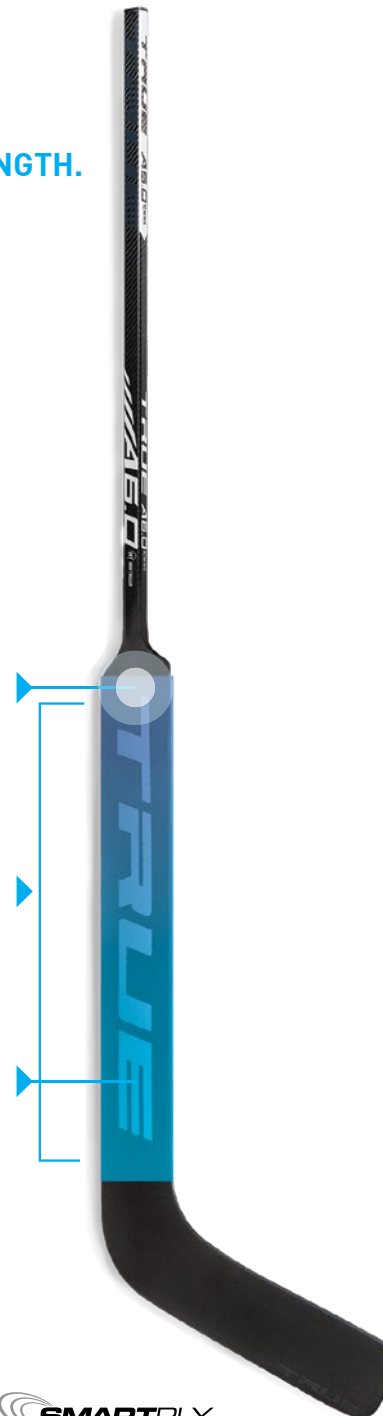

24%

greater shaft impact strength over its predecessor!

IMPROVED SWING WEIGHT for a lighter-feeling stick with ultimate strength.

LOW KICK PROFILE, similar to foam core, for quick release and greater puck control.

BRAIDED RIB throughout for a thinner, light-weight paddle with increased durability.

REDESIGNED FLEX ZONE

The redesigned flex zone within the ASERIES HT '18 paddle is optimized for enhanced power and balance, providing faster load times and quicker passes.

IMPROVED WEIGHT & BALANCE

By removing material from the lower paddle area, the balance point shifts towards the handle, offering greater control and maximizing puck-handling capabilities.

ENHANCED PADDLE DURABILITY

Our improved BRT+ technology has been extended into the paddle, as well along the edge of the blade and into the heel improving balance while maintaining durability.

OPTIMAL REBOUND CONTROL

The viscoelastic layer in the blade and paddle provide more absorption on impact, offering rebound control benefits that mimic a Pro Foam Core model.

TRUE

BY SCOTT VAN HORNE

With more than 25 years of experience in handcrafting performance-driven skates, Scott Van Horne delivers power, fit, and protection in the TRUE Pro Custom Skates. Precision crafted for your feet - not the shelf, these pro-grade skates offer a high performance, pain-free skating experience unmatched by any other. The result? The #1 Custom Skate in hockey. **That's TRUE.**

FIT FOR PERFORMANCE

Scott Van Horne

TRUE

BY SCOTT VAN HORNE

UNRIVALED **POWER**. CUSTOM **FIT**. UNMATCHED **PROTECTION**.

SKATE TECHNOLOGY

AN EVOLUTION IN SKATE DESIGN.

Our patented carbon fiber, monocoque design yields more direct power transfer and unmatched control while in stride or using your edges.

FINALLY, A PAIN-FREE SKATING EXPERIENCE.

Built from the inside out using a custom 3D foot last shaped to the individual skater's foot, our two-tiered customized thermoformed boot locks in the foot, eliminating loss of energy and producing unrivaled power, comfort, and control.

OPTIMIZED FOR ANY TYPE OF SKATER.

The patented TRUE tendon guard provides optimized flexibility and stability in every stride for a more direct and fluid power transfer.

ULTIMATE FIT, COMFORT, AND PROTECTION.

Formed over the monocoque shell, the patented TRUE ToeCap provides superior comfort and unrivaled protection.

PERFECT SKATING POSITION.

The strategically placed eyelets put the player in an optimized knee-forward position, facilitating natural and more direct energy transfer and maximum power in every stride.

LIGHTWEIGHT AND DURABLE.

The antimicrobial and hydrophobic liner wicks moisture to the venting holes to keep your feet dry and comfortable.

STAY IN THE GAME.

Averaging 18 seconds per holder, our BenchChange technology allows for faster blade replacement via TRUE's magnetized blade change tool provided with each pair of skates.

BEST IN CLASS EDGE CONTROL.

Made in Canada with only the finest raw materials, the best-in-class Step Steel blade carves through the ice with precision and power.

TRUE

TRUE PRO CUSTOM PLAYER SKATE

The first of its kind, the TRUE Hockey's Pro Custom Skate delivers power, fit, and performance. Utilizing a patented multi-layered process built from the inside out and a 3D anatomical foot scan, these skates are custom fit for your foot – not the shelf.

TRUE Pro Custom Skates.

TRUE

PRO CUSTOM ONE-PIECE GOALIE SKATE

- Our one-piece molded design leads to zero loss of energy and responsive power transfer allowing goalies to get across the crease faster.
- The lower profile also assists with maintaining edges before committing to the shooter. Without a traditional cowling, our boot allows for lower position to the ice, for heightened feel, maximum control, and improved attack angle.
- Patented carbon fiber, monocoque design yields more direct power transfer and unmatched control while in the crease.
- Strategically placed eyelets put goalies in the deepest attack position, facilitating natural and more direct energy transfer when moving laterally.

FIND YOUR CUSTOM FIT

THE FIRST OF ITS KIND, ZPALM REPLACEMENT PALM TECHNOLOGY ALLOWS PLAYERS TO EFFORTLESSLY INTERCHANGE THEIR PALMS WITHIN SECONDS TO FIT THEIR INDIVIDUAL NEEDS.

HOW IT WORKS

1 Simply line up the zipper on the palm with the one on the glove shell and zip it.

2 Follow the zipper around the fingers of the glove until you reach the end.

3 Once the zipper arrives at the end, simply pull back the cuff roll and attach the Velcro strap.

HOCKEY PANTS

Our unique X-Tec Suspension Technology uses coated nylon and HD foam to help players withstand hard contact in their hips and kidney areas.

PLAYER BENEFITS

POLYESTER-NYLON STRETCH GUSSETS

Designed For Flexibility.

Polyester-Nylon stretch gussets allow for superior flexibility while the padded loop throughout the belt and lace ensures a perfect fit.

(PE) PLASTIC SHELL

Built For Protection.

The perforated molded polyurethane (PE) plastic shell protects against hard contact throughout the hip and kidney areas. The 800 Denier Nylon exterior shell prevents injury in high-abrasion areas while a tactical mesh ripstop helps protect the back leg area.

ANTIMICROBIAL LINER

Optimized For Breathability.

An antimicrobial liner throughout the pant eliminates odor and bacteria. Tactical mesh ripstop material allows for increased airflow and breathability.
